

### ***Hydrangea paniculata 'Limelight'***

*A stunning paniculata form of Hydrangea that produces large, showy lime green flowers mid-summer. This medium growing, deciduous shrub is perfect for use as an accent plant in a shrubbery, mass planted in a woodland area or planted as an informal hedge.*

*Flowers make a great cut flower for the vase.*

### **Where to Grow**

- *Plant in morning sun and afternoon shade*
- *Best grown in organically rich, well-drained soil*
- *Grows 2mtrs high x 2.5mtrs wide*

### **Planting**

- *Plant in free draining soil*
- *Water well while the plant is establishing itself*
- *Medium - fast growing*

### **Care**

- *Hydrangea 'Limelight' produces flowers on new wood.*
- *Prune late winter or early spring*
- *Apply a slow release fertiliser or sheep pallets early spring*
- *Flower colour is stable regardless of the soil pH*
