

Salvia 'Wish' series

Fast growing, dry tolerant Salvia's are a stunning addition to the summer garden.

The vibrant colours of the wish series certainly give an interesting contrast to any mass planting, producing long lasting displays of colour from late spring to early Autumn.

Where to Grow

- *Plant in a sunny position*
- *In a medium to large container plant for patios or on decks*
- *For vibrant displays plant en masse in mixed borders and perennial gardens.*

Planting

- *Best grown in organically rich, well-drained soil*
- *Water well while the plant is establishing itself*

Care

- *Prune by one third when flowers have finished to encourage plants to re-flower*
- *Apply a slow release fertilizer early spring*
- *Keep watered during the summer months*
